DETAILED ACTION

This Office action is responsive to the RCE filed on 9/9/05.

1. Claims 1-13 and 23-35 are allowed and renumbered as 1-26, respectively.
2. The following is an examiner's statement of reasons for allowance: the prior art taken either singly or in combination fails to anticipate or fairly suggest the method steps of:
 - a) applying a polymer material to a surface of the package substrate; attaching pins to the package substrate, through the polymer material, by solder reflow, and *allowing the polymer material to cure about solder joints associated with the pins*, as recited in independent claims 1 and 23,
 - b) *selectively applying an encapsulation material about solder joints associated with the individual pins, the encapsulation material to maintain a location of the individual pins on the package substrate during subsequent high temperature processing*, as recited in independent claims 10 and 32; especially when these limitations are considered within the specific combination claimed.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
